Achieving the “NICHIBAN GROUP 2030 VISION” based on our new NICHIBAN Group Philosophy

NICHIBAN was founded in Minami-Shinagawa, Tokyo in 1918. After facing numerous hardships during and after the war, it succeeded in growing and developing into the company we know today, and we proudly celebrated 100th anniversary in 2018.

Since April 2019, we have undertaken corporate activities with our sights set on the next 100 years. We have taken “Respect for people’s cooperative relationships and striving to foster prosperity and happiness for all stakeholders of the NICHIBAN Group” as our mission based on the newly established NICHIBAN Group Philosophy. We will continue to build an organization capable of meeting ever-changing market needs in a timely manner and of competing on the world stage, and practice management policies that deliver earth-friendly products based on advanced technical skills and reliable quality. Going forward, we will work together to fulfill our aim of becoming a “company that continues to create value in support of comfortable lifestyles while making a contribution on the world stage.”

I trust that we can rely on your continued support and patronage of the NICHIBAN Group.
